

T2, UNINSULATED TENT HALL

The versatile tent for storage and work offers protection against wind and weather.

The T2 is widely used to cover construction and workshops, but is also suitable as a showroom. This tent offers protection from weather and wind due to the closable side walls.

This tent hall is very suitable for storage of goods and execution of activities that are not temperature sensitive. The T2 comes standard without floor and doors, but it is certainly possible to give this tent additional options. Think of an electric rolling door, lighting and collision protection.

Width:
2,5 - 30 meter

Length:
Unlimited extension of 5 meters

Side Heights:
2,3 meter | 3 meter | 4,5 meter

Roof lining standard:
PVC tarpaulin
Sidewall trim standard:
PVC tarpaulin
Cladding standard:
PVC tarpaulin

Aluminium:
Quality Class 6082T6

ADDITIONAL RETAIL SPACE FOR INTRATUIN

Emmeloord (NL) | 12,5 x 45 meter | 2,3 meter side height |
Transparent side curtains, double door and lighting | Decking

For no less than 7 months, Intratuin Emmeloord is undergoing major renovations. That means that part of the garden center can temporarily not be used. That is a problem, because the outdoor season is about to start and a lot of garden furniture is sold. In order not to lose sales, it was necessary to create a temporary store space.

The parking lot of the garden center is large enough to create an extra space. We ended up erecting a tent here that was 12.5 meters wide and 45 meters long. So more than 560 m2 of temporary store space was built up, and that in just a few days.

This tent has a double, glass door as entrance and exit and there is lighting inside the tent. To allow natural light into the tent as well, one long side was chosen to be completely covered with transparent side curtains.
