

# T3, PARTLY INSULATED TENT HALL

*This tent hall can hardly be called a tent anymore, rather a hall or shed.*

The T3 is used to store light temperature sensitive goods, but this tent hall is also very suitable for a temporary business space. Due to the sandwich wall panels, the tent can be customized with windows, wicket doors and overhead doors.

This tent hall is often erected for long periods of time because of the comfort it provides. For example, we installed a T3 after a party center burned down completely. The tent ensures that no turnover is lost.

**Width:**  
2,5 - 30 meter

**Length:**  
Unlimited extension of 5 meters

**Sidewall trim standard:**  
Sandwich Panel 40 mm

**Cladding standard:**  
Opaque PVC tarpaulin 750 gr/m²

**Aluminium:**  
Quality Class 6082T6

## UNDER SPECIAL STORE

Yde de Punt (NL) | [15 x 35 meter and 20 x 45 meter \(linked\)](#) | 3 meter side height

Seasons Products is a specialist in private label fulfillment for the garden retail industry. They supply fertilizers, grass seeds, limes and ecological pesticides. In Yde, they have a large site where many of these products are stored. Yet they are short of storage space in the peak season.

A large number of garden products must be stored under a special climate. For this, Seasons Products needs a storage tent in which they can control the temperature. The T3, a tent hall for slightly temperature-sensitive products and materials is very suitable for this purpose.

The tent hall is equipped with three electric rolling doors, three wicket doors and two fans and heaters to keep the temperature inside the tent properly.
