

T4, FULLY INSULATED TENT HALL

No problems with condensation, therefore ideal as a showroom, office or store.

The T4 is used as temporary business premises or storage for very temperature sensitive products. This tent hall comes standard with double roof tarps and a compressor to fully insulate the tent. The roof tarps are inflated with air, that stagnant air forms the roof insulation.

Due to the full insulation, this tent does not have condensation on the inside. This allows products and materials to be protected from all outside influences. At the same time, it is also a comfortable working environment.

Width:
10 - 30 meter

Length:
Unlimited extension of 5 meters

Side Heights:
2,3 meter | 3 meter | 4,5 meter

Roof lining standard:
Double layer translucent PVC tarpaulin 600 gr/m²

Sidewall cladding standard:
Sandwich panel 40 mm thick

Cladding standard:
Double layer translucent PVC tarpaulin 600 gr/m²

Aluminium:
Quality Class 6082T6

PHOTO STUDIO AND OFFICE IN ONE FOR MINT CITY

De Meern (NL) | 15 x 25 meter | 3 meter side height

Muntstad is a large car dealer in De Meern. Here occasions, but also new models are sold. Muntstad puts all the cars to be sold in nice pictures and posts them on the website. A photo studio was needed to photograph the cars in the same way with high quality. The studio could not be realized in the current building.

They chose a semi-permanent tent hall at the back of the property. Cars could be parked and be photographed. In the hall, an enclosed 5-by-5-meter office was created where the photos are edited immediately.

The office can be entered from both inside and outside. On the outside, the office is all glass, with a double glass walkway door and a glass wall.
